A MANUAL for the STUDY of SEPULCHRAL SLABS and CROSSES of the MIDDLE AGES. By the Rev. EDWARD L. CUTTS, B.A. 8vo., illustrated by upwards of 200 Engravings, 12s.

"We express unqualified commendation of the eighty-three plates appended to this work; they are beautifully executed, and with the notes appended to them, form a very complete manual for the antiquary, and furnish a copious subject of study for the ecclesiologist who is debarred from travel."—*Ecclesiologist*, October, 1849.

"It is with pleasure that we see that this work, although got up with great perfection, is within the reach, not only of Architects and the higher order of artists, but also of the masons and operatives into whose hands the execution of our funereal monuments is now so generally intrusted; and they may be assured that an attentive study of this valuable book would so improve their intellects and feelings, that they could not fail to improve the class of work on which they are so much engaged."—*Architect*, Oct. 13.

RICKMAN'S GOTHIC ARCHITECTURE: an ATTEMPT to DISCRIMINATE the DIFFERENT STYLES of ARCHITECTURE in ENGLAND. By the late THOMAS RICKMAN, F.S.A. "The best and most popularly written manual on the subject."—*English Review.*

"The engravings are of the first class of art."—*Morning Post.*

"The majority of the illustrations are from original drawings, executed expressly for the purpose, and have the disastrous effect of rendering all former editions of the work comparatively worthless. Those who have Rickman, equally with those who have not, must buy the present edition. The illustrations are clear, precise, sparkling; and we commend the work as absolutely necessary for every architectural student."—*The Builder.*
